PH: 9296 0018

Ground Control Level 1 – Thursday Dec 13th 2012

The Clinic will be covering the Double Dan Horsemanship techniques in ground control and body control – techniques that will set a solid foundation from which to advance your horsemanship. If there are particular problems you would like to address in the clinic – make Dan & Dan aware of them at the commencement of the day and they will be sure to go through them with you.

This clinic is suited to young horses right thru to older horses. Broken or unbroken, stallions and colts are also welcome as long as you have a handle on them and wont disrupt the entire class with totally unruly and dangerous behaviour.

The clinic will introduce the techniques covered in the "Ground Control Explained" DVD which is available for purchase thru our on line shop - and will be available for sale at the clinic.

Equipment to bring:

- Halter & lead rope
- Whip – driving or lunging

Equipment will be available to purchase at the clinic.

BOOKINGS : HERE at the bottom of this page or email – admin@doubledanhorsemanship.com.au

LONG REINING & RIDDEN – Friday Dec 14th, Saturday Dec 15th & Sunday Dec 16th 2012

Over 3 days - this Clinic will be teaching the basic skills required for long reining. Long reining is a valuable tool for all horses. It can be used in a variety of purposes, from mouthing the young horse to teaching a horse to move forward into the contact, re-educating horses with behavioural and training issues as well as further educating the older horse and building strength and flexibility. You will progress to under saddle exercises and manoeuvres – confirming your understanding of the direct relationship and benefits gained from the long reining techniques learned at this clinic.

Equipment to bring:

- Halter & lead rope
- Roller, Long reins
- Driving or lunging whip
- Saddle & Bridle

Equipment will be available for purchase at the clinic.
