

TRANSITIONS CLINIC

Transitions Clinic
21 February

- Are you or your horse feeling unbalanced in transitions?
- Does your horse rush or hop into trot?
- Struggling to achieve the correct canter lead?
- Do downward transitions feel choppy, or does your horse halt instead of smoothly transitioning?

This clinic is suitable for both Western and English riders. Designed for green horses and novice riders, this clinic focuses on rider and horse biomechanics to improve balance, clarity, and softness through transitions. Sessions are conducted in a small, supportive environment to encourage confidence and relaxation.

There will be no spectators, allowing riders to focus fully on learning without feeling judged.

Located on property at Leah Dowson Performance Horses in El Caballo
